## EDUCATION

**BS Software Engineering**  
CUST, Islamabad  
2022 – Present (Yr 4)

## Intermediate (ICS)

Punjab Group of Colleges  
2020 – 2021

## KEY SKILLS

- Python
- JavaScript / PHP
- HTML5 / CSS3
- MySQL / SQL
- C++
- LangChain / ChromaDB
- Pandas / NumPy
- Git / OOP / UML

## INTERESTS

- Software Quality & Testing
- AI & Automation
- Full-Stack Web Dev

## SUMMARY

Final-year BS Software Engineering student at CUST with a broad foundation in programming, web development, data analysis, and machine learning. Studied core software engineering disciplines including software quality, security, AI, and system design. Gained practical experience through academic projects spanning full-stack web development, supervised ML, and AI-powered applications, complemented by a 6-week on-site ML & AI internship. Comfortable working across different areas of a software project and eager to contribute in a professional team environment.

## INTERNSHIP

### ML & AI Intern — EziTech Institute, Rawalpindi

Aug – Sep 2025

On-Site | 6 Weeks | Intern ID: ETI-06-25-1878

- Performed exploratory data analysis and built visualizations using Pandas, NumPy, Matplotlib, and Seaborn.
- Built a Scikit-learn preprocessing pipeline covering imputation, encoding, and feature scaling on the Titanic dataset.
- Trained and evaluated a Linear Regression model on the California Housing dataset; computed RMSE, MAE, and  $R^2$  metrics.
- Developed an AI-powered Cold Email Generator as the final project using Streamlit, LangChain, and ChromaDB.

## PROJECTS

### Car Rental Management System

HTML · CSS · JS · PHP · MySQL

- Built a full-stack web app with user authentication, vehicle management, and booking backed by a relational MySQL database.

### Animal Detection System

Python · TensorFlow

- Trained a supervised image-classification model on labelled animal datasets with an end-to-end Python prediction pipeline.

### Software Design & Documentation

UML · Use Cases · System Models

- Produced formal software design documentation — UML diagrams, use cases, and system models — for the Car Rental System.

## ACHIEVEMENTS

### Internship Completion Certificate — EziTech Institute

### APPEC — All Pakistan Prompt Engineering Competition

## RELEVANT COURSEWORK

Software Quality Engineering · Software Architecture & Design · Penetration Testing · Information Security & Forensics · Artificial Intelligence · Web Engineering · Human Computer Interaction · Software Project Management · Data Structures & Algorithms · Database Systems · Computer Networks · Operating Systems

## TECHNICAL SKILLS

**ML & Data:** Scikit-learn, TensorFlow, LangChain, ChromaDB, Pandas, NumPy, Matplotlib, Seaborn

**Web:** HTML5, CSS3, JavaScript, PHP, MySQL, Streamlit

**SE Tools:** Git, OOP, Design Patterns, SDLC, UML, Google Colab
